Technical solutions for today's business

Who We Are The Origin of Agilutions

Agilutions (pronounced 'a-jel-u-shens') is an experienced software implementation firm that has built a solid reputation for helping clients elevate and improve their businesses.

Simply put, we build software that makes our clients' lives easier and their organizations run more effectively. Working primarily with associations and credentialing organizations, we offer a boutique-type client experience that centers on quality, customer service and results.

As an **Avectra Implementation Partner**, we customize netFORUM software to develop technical applications that meet a number of unique challenges. Since our skilled team has worked on both sides of the implementation process, our collective background gives us the expertise needed to provide an all-encompassing approach to technology and customer service that differentiates us in the industry.

This means we can create customer relationship management platforms that are intuitive and provide optimum support to enhance and facilitate membership management and online certification. It also means that we can coach our clients to utilize technology to propel their businesses forward in the most successful directions.

What We Do You Come First

Agilutions is proud to be the first technology company of its kind to offer **simplified** technical solutions that **amplify** customer experience. Every solution we implement is concise, effective and developed to help our clients reach their goals. It starts with our one-of-a-kind solution coaching which enables us to identify how to best utilize **netFORUM** software.

Once we know the details, we develop a solution that focuses on automating key processes, such as online applications, membership dues, profiles and renewals. After each implementation, Agilutions' first-rate training and post-production support helps clients seamlessly optimize their operating systems for continued success.

Our complete solution saves time and resources by enabling our clients to focus less on paperwork and record-keeping and more on strengthening customer relationships, recruiting new members and marketing events and services. And beyond the fact that we create sound technical solutions, our clients tell us that they enjoy working with us because we listen to what they say and work hard to get the results they want. In a nutshell, we care about every client we work with and it shows.

ASSOCIATION TECHNOLOGY Simplified

Better membership relationship management starts here

At Agilutions, we use our deep knowledge in technology, consulting and analysis to turn great associations into even better ones. That's why associations that are serious about exceeding expectations, automating key tasks and growing their membership community turn to Agilutions. Not only do we develop turnkey technical solutions that enable our clients to make the most of *their* technology, but we also collaborate with our clients to formulate strategies to effectively enhance member relationships.

In addition to the fact that our solutions exceed our customers' expectations, we offer a simple approach that makes the implementation process enjoyable. Yes, we said enjoyable. Our clients tell us the difference lies in our iterative methodology, which keeps our client-partners involved in every step of the process. By adopting an organized and inclusive approach, we can ensure every project stays on track, lives up to our impeccably high standards and meets our clients' objectives.

HOW WE DO IT

"Investment Management Consultants Association was searching for the best systems design firm and ended up finding a business partner we could grow with. By utilizing Agilutions, we receive input for both a systems solution and a best-practice business solution, which makes all the difference."

Dede Pahl | Executive Director
INVESTMENT MANAGEMENT CONSULTANTS ASSOCIATION (IMCA)

CERTIFICATION TECHNOLOGY Simplified

Discover a more automated certification process

Since every certification is different, technology needs to be adaptable to a wide range of requirements. That's why when it comes to credentialing, Agilutions is proud to offer a best-in-class solution that centers on both organization accreditation and individual certification. Our expertise sets us apart from the competition because we understand our clients' needs and can solve complex time-consuming challenges with easy and reliable solutions.

Our skilled approach allows credentialing organizations to turn cumbersome manual processes into automated ones. Data is kept in one central place, which makes it easy to access a real-time snapshot of activity. By simply logging in to a customized dashboard, users can better manage, measure and report on every aspect of their certification process. And, since our solution is complete and scalable, it's effortless to keep track of applicants over time and possible to update existing requirements or add new certification steps. This changes the entire way our credentialing-partners approach their certification by reducing the need for data entry, paperwork and phone banks, which frees up resources for other key tasks.

HOW WE DO IT

"Agilutions is one of my favorite vendor partners. I consider them a strategic asset to my association. They embrace our objectives as their own and work side-by-side with us to achieve them. They are uncommonly quick at understanding business processes and have the unique ability to persistently and gently persuade end users to accept improvements to business processes and system changes. They don't believe in accepting "but that's the way we've always done it." Their deep knowledge of netFORUM and credentialing has been invaluable to us. On top of it all, they are just great people to work with - they possess excellent communication skills, listen to our needs, are funny and calming, have the highest degree of integrity and are darned nice."

Mike Guerrieri | Information Technology Director | AMERICAN SPEECH-LANGUAGE-HEARING ASSOCIATION (ASHA)

CUSTOMER EXPERIENCE Amplified

Welcome to a Zen-like technical experience

Most people wouldn't necessarily put "Zen" and "technical" in the same sentence, unless, of course, they have worked with us. We amplify customer experience through an enlightened approach that centers on simplicity, client know-how and years of experience using eXtreme Programming (XP). Not only do we go the extra mile to make sure that our clients receive complete solutions they can count on for years to come, but we also give them the tools to grow *their* client relationships.

In fact, we attribute our technical expertise, attention to detail and forward-thinking approach to customer satisfaction as the keys to our success. We are proud to say that we have developed a number of long term partnerships with well-known associations and credentialing organizations. In fact, client referrals are one of the most crucial ways we've been able to grow our business.

HOW WE DO IT

Contact us today at **303.298.8562** or information@agilutions.com to find out what we can do for your business.

"Agilutions took AAHA to a whole new level. They not only helped with projects such as building our on-line shopping cart, but they taught us along the way so we can be self sufficient. They helped us to gain the knowledge to expand netFORUM in-house and provided the tools we need to continue to build our association."

Denise Greenwell | Senior Manager, Information Technology
AMERICAN ANIMAL HOSPITAL ASSOCIATION (AAHA)

"I like working with Agilutions because they are highly skilled at implementing the right software for our needs and understand the unique aspects of our association. I also appreciate that they are professional, yet easy to work with - a rare find in the industry."
